PROFESSIONAL SUMMARY

Certified Network/Cybersecurity professional actively pursuing entry-level positions in IT and cybersecurity. Hands-on experience in network configuration, TCP/IP fundamentals, Windows and Linux administration and core cybersecurity practices. I am skilled in Oracle VirtualBox and VMWare workstation virtualization tools, and security tools such as Wireshark, Nmap, Hashcat, EVE-NG, and Kali Linux for vulnerability analysis, network monitoring, and threat identification and detection. A strong performer in competitions with a 2.5% ranking in the National Cyber League. Results-driven, reliable team player with a proven work ethic, eager to contribute to security operations and grow within a dynamic IT team.

- Strong oral and written communication abilities proven through clear technical documentation
- Looks out for others and contributes to team success
- Self-motivated, highly detail-oriented, organized and dependable in delivering quality results on time.

EDUCATION

George Stone Technical College - Pensacola, Florida

- **Network Support Services** | February 2025 – Present

- Designed and configured virtual network environments in EVE-NG and VMware Workstation Pro, incorporating Aruba switches, PfSense firewalls, Windows Server, Active Directory & Linux Mint systems
- Rebuilt Dell servers and personal computers; assembled and installed both Cat5e and coaxial cabling
- Served on the Student Advisory Council, representing classmates by gathering feedback and presenting concerns to school administration. Also played a major role in launching the school's Manna Food Drive, collaborating with other students to collect and donate over 1,200 pounds of food for those in need since November 2025.
- **Cybersecurity, Applied | March 2024 – February 2025**
 - Completed labs and simulations using Cisco Packet Tracer
 - Competed in the semi-annual National Cyber League (2024 and 2025), achieving top 2.5% individual ranking nationally and top 4% as part of a team
 - Gained practical experience in Kali Linux environment, mastering tools including Wireshark, Nmap, stegsolve, aircrack-ng, CyberChef, Curl, ExifTool, Binwalk, Strings, HxD, xxd, John the Ripper, and Hashcat
 - Developed proficiency in Open-Source Intelligence (OSINT) gathering and analysis techniques using tools such as Google Images and Maps, Jimpl.com, and Wayback Machine

EXPERIENCE

- **Freelance Assistant - 100% Home Improvement | 2016 – Present**
 - Supported residential construction projects by installing doors, cabinets, and completing interior painting jobs, improving my project efficiency and workmanship quality
 - Performed precise grouting and finishing tasks that enhanced the durability and appearance of tile installations
 - Assisted lead contractor with material preparation, flooring demolition, site cleanup, and tool handling to maintain a safe and organized work environment
 - Contributed to timely project completion through reliable labor support and consistent attention to detail
- **Chick-fil-A Leader Academy - Student Volunteer | 2019-2020**
 - Coordinated a Christmas event for families at Loaves and Fishes family shelter, creating an engaging and warm environment
 - Secured food donations from Hungry Howies' Pizza, increasing available resources for families and reducing event costs
 - Distributed gifts and facilitated craft activities that encouraged creativity and engagement among the children
 - Read Christmas stories and provided hands-on supervision to support a positive holiday experience for families in need
